DETAILED ACTION

Allowable Subject Matter

Claims 1-28 are allowed in view of the Applicant's arguments (Response filed 5/15/2006) and the cited prior art of record. The independent claims recite a network interface device outputting TCP/IP ACK packets, by slow-path processing (TCP layer and IP layer processing) a first TCP packet and fast-path processing (no TCP layer or IP layer processing) a second TCP packet, pushing pointers to packet information on a first and second transmit queue, popping the second queue for a pointer to packet information and outputting the packet information in the form of a TCP ACK, then popping the first transmit queue for a pointer to packet information and outputting the packet information from the network device in the form of a TCP/IP packet, the TCP ACK being output from the network interface device before the TCP/IP packet, everything happening within the network interface device, which, in addition to the rest of the claim limitations, are distinguished from the prior art. For support, see Instant Specification (paragraphs 16-20, 23-27)

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
